American History	(3)	C

Instructions for Figuring your Grade Point Average

First, you need to know what grading scale is being used. For this exercise the university is on a 4.00 grading scale. This means each letter grade is assigned a number for figuring the Grade Point Average.

On a 4.00 grading scale each letter grade would be worth:

$$A = 4$$

$$B = 3$$

$$C = 2$$

$$D = 1$$

$$F = 0$$

Each course is worth a certain number of credit hours. In the examples for this activity, the credit hours are listed in the ().

Multiply the number of credit hours and the value of the letter grade. Add up the results. To determine the GPA, divide this number by the number of credit hours. The answer will be the Grade Point Average on a 4.00 scale.

The first two are completed for you. All you have to do is get the final GPA. The last one is left for you to complete and find the GPA.

GPA Activity

American History	(3)	C [2]	$3 \times 2 = 6$
English I	(3)	B [3]	$3 \times 3 = 9$
Art Appreciation	(3)	D [1]	$3 \times 1 = 3$
Health/Wellness	(1)	A [4]	$1 \times 4 = 4$
Biology	(3)	B [3]	<u>$3 \times 3 = 9$</u>
Total	13 hours		31 points 31/13 =

English	(3)	B [3]	$3 \times 3 = 9$
American History	(3)	A [4]	$3 \times 4 = 12$
Music Appreciation	(3)	C [2]	$3 \times 2 = 6$
Health/Wellness	(1)	A [4]	$1 \times 4 = 4$
Earth Science	(3)	B [3]	<u>$3 \times 3 = 9$</u>
Total	13		40 40/13 =

English	(3)	A	
Beginning Algebra	(3)	C	
Chemistry	(3)	F	
Golf/Bowling	(1)	A	
American History	(3)	C	

For each sample, what would happen if one grade changed by one letter higher? One letter grade lower?

What advice should be given to the student about the course grade of 'F'?

What is the minimum GPA a student can have and still be considered "in good standing" at your institution?
